DETAILED ACTION

Claim Objections

Claim 5 is objected to because of the following informalities: The words "part is" are repeated in line 2. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, and 6-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Buell et al. (5,653,704).

Buell discloses an absorbent product 20, as shown in figure 1, comprising a casing having an outer side 26, an inner side 24, a front part 56, a rear part 58, a crotch part, and an absorbent structure 28. A fastening system 36 attaches opposing side portions of the front part 56 and rear part 58, as disclosed in column 22, lines 13-17. The fastening system comprises at least two cooperating fastening elements. The first element is attached to the front part 56 of the casing and comprises a landing zone 44 and a skewing-preventing part 46, as shown in figure 1. The landing zone 44 cooperates with a second element 42, as disclosed in column 22, lines 29-32. The skewing-preventing part 46 is adapted to adhere to the rear part of the casing, as disclosed in column 31, lines 2-8.

Art Unit: 3761

With respect to claims 2 and 3, the landing zone 44 may be defined to be a single section of the first element 38, as shown in figure 1, or may be defined to be two separate pieces of the first element 38. The landing zone 44 may further be defined to end adjacent the skewing-preventing part 46, and thus the skewing-preventing part 46 is positioned laterally on the outside of the landing zone or zones 44.

With respect to claim 4, the skewing-preventing part 46 is positioned at a distance of 3mm to 15 mm from a lateral side edge, as disclosed in column 31, lines 26-28.

With respect to claim 6, the skewing-preventing part 46 comprises a hook material which is fully capable of adhering to the inner side 24 of the casing, as disclosed in column 31, lines 2-8.

With respect to claims 7 and 8, the landing zone 44 comprises a loop material and the second element comprises a hook material, as disclosed in column 25, lines 37-40.

With respect to claim 9, the skewing-preventing part 46 is fully capable of adhering to the backing sheet material of the side edges.

With respect to claim 10, the absorbent product 20 is a diaper or an incontinence garment, as disclosed in column 1, lines 17-18.

Allowable Subject Matter

Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3761

Response to Arguments

Applicant's arguments with respect to U.S. Patents 5,897,546; 5,984,911; and 6,406,466 have been fully considered and are persuasive. Therefore, the rejections have been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Buell et al. (5,653,704).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
